## Information About the Tour...

One of our education ambassadors will guide you through both of our brewhouses—our original 30 barrel system and our 2011 addition, two Steinecker Combicube B brewhouses; our cellar, with fermenters and bright tanks of various shapes and sizes; our on-site warehouse; and our packaging hall, which includes a KHS kegging line and a Krones bottling and canning line. All of this equipment helps us produce enough beer to be the 17th largest craft brewery by sales volume in 2014—and we continue to grow. Our education ambassador will explain what is unique about our process and will answer any questions that you may have along the way. Come armed with questions!
